

God of the Universe

Christian astronomer David Block tells us that the Milky Way contains 100 billion stars. Can you imagine – 100 billion! And that is just one small part of the vast heavens of which our planet is but a tiny speck. By comparison, considering the tiny spot that our earth occupies in the universe, it is hard to believe that the Creator of the cosmos cares about what happens to the human family.

But let's make it even more personal. The astonishing truth is that God cares about you. When you slept during the night, He brought you the peace of mind to do so. When you awoke this morning, He gave you the breath for a new day. When you took a shower and dressed for work at Life Care, Century Park or Life Care at Home, He was already preparing your mind for the responsibilities that lay ahead. No one will ever love you like He does.

Not only does God care, but He treats everyone as if we were the sole object of His loving attention. Psalm 147:3-4 is a passage that contrasts the star-studded sky with the hurts of a single soul. "He heals the brokenhearted and binds up their wounds. He counts the number of the stars. He calls them all by name."

What an assurance! The wisdom and power that sustains the whole galaxy are focused on every believer. That ought to bring you confidence and strength for today.

He Who holds the stars in space will surely uphold His saints on earth. Count on it.
