

Stop and Think First

A professor at UCLA Medical School posed a question to the students in his class. Before the question, he presented the family history for information on which to base their answers.

The father has syphilis. The mother has TB. They already have four children.

The first child is blind. The second had died. The third is deaf. The fourth has TB.

The mother is pregnant. The parents are willing to have an abortion if the students decide they should.

So the professor asked the question: "What do you think?"

Most of the students decided on abortion.

"Congratulations," said the professor. "You have just murdered Beethoven!"

Nothing is as final as murder, even when it is done very early in a life.

All life is precious, and that is why we in Life Care, Century Park and Life Care at Home are engaged in our mission.
