

## *The Wonder of Creation*

Those who contend that the world evolved from a cosmic “big bang” cannot account for the wonder of all creation. Who can contemplate the magnificence of the universe without acknowledging the greatness of God? Consider these facts about the precise design of our amazing planet:

- The distance of the earth from the sun, approximately 93 million miles, is just right to sustain life.
- The 23½-degree tilt of the earth on its axis ensures seasonal changes, without which much of the earth would be desert.
- The balance of oxygen (21 percent) and nitrogen (78 percent) in the air we breathe is perfect for supporting life.
- An ozone layer in the atmosphere shelters our planet from deadly ultraviolet rays from the sun.

These facts all speak of a God of order, design and greatness. Even more amazing, however, is the realization that God has taken a personal interest in you and in me. He cared so much that He sent His only Son to die for us.

The great Creator became our Savior. He is an awesome God, indeed.

*The heavens declare the glory of God; and the firmament shows His handiwork.*  
(Psalm 19:1)

--Beecher Hunter
